Use of colormunki photo device for calibrating screens and printers

The ACC committee has purchased a colormunki photo calibration device for the use of ACC members in the belief that this will be a benefit to them. However members should be aware of the following conditions relating to the use of this device, and use of the device by a member constitutes acceptance of these conditions.

- (1) Members are responsible for the safe keeping of the colormunki while it is in their care. It is an expensive and delicate piece of equipment and should be treated as such.
- (2) Make sure you receive and return all parts, manuals, computer disks, packaging etc. A check list is included with the colormunki.
- (3) Do not attempt to repair or modify the colormunki. If you do experience any technical problems then please contact the nominated committee member first.
- (4) Make sure you read the instructions carefully and use it only in the manner described.
- (5) ACC accepts no responsibility for any damage or subsequent loss resulting from using the colormunki.
- (6) ACC gives no guarantee about the quality of any changes made to you computer, screen, printer, other peripheral devices, software or the configuration of your computer as a result of using the colormunki and its associated software. You use it at your own risk.
- (7) You are strongly advised to make backups of your computer hard drive before installing the colormunki software and using the colormunki.
- (8) Use of the colormunki and its software by a member implies acceptance of the colormunki's terms and conditions.
- (9) The colormunki is for the use of ACC members on their own computer equipment only.
- (10) DO NOT REGISTER THE DEVICE; this has already been done.

At present Bill Pemberton is the nominated committee member for this equipment.
